## SKILLS

### Languages

C, Java, Python, Javascript, C#, Dart

### Full Stack Development

HTML · CSS · JS · .NET Backend

### Technology

Flutter · ASP .NET

### Database

MySql · Firebase

### Development Tools

Android Studio · VS Code · Git ·

NetBeans · Visual Studio

## ACHIEVEMENTS

### 📌 Solved 1000+ DSA problems

500+ Days on Leetcode and solved 600+ problems  
Solved 150+ problems on GeeksForGeeks  
Solved 400+ short problems on CodingNinjas

### 📌 Runner's Up of Techathon 2.0

Team Event Organised by Gateway Group Of Companies , ahmedabad

### 📌 Completed 2 Virtual Internships

Completed Internship in Java from CodeClause and in Full Stack Web Development from Bharat Intern

## SUMMARY

A highly motivated and detail-oriented Software Engineering fresher with a strong foundation in coding and problem-solving. I am passionate about leveraging technology to create innovative solutions and continuously learning new skills to stay ahead in the fast-paced tech industry. I thrive in collaborative environments and am eager to contribute to projects that challenge my abilities and drive meaningful change.

## EDUCATION

**BTech(Computer Science And Engineering)** 2021 - Present

**Darshan University**

Rajkot

CGPA | **8.69**

**HSC - Science(A)**

2020 - 2021

**SSSV High School**

Jamnagar

## EXPERIENCE

**Flutter Developer Intern**

03/2024 - 06/2024

**AiDops**

Remote

During my internship I developed a Project Management Tool application designed to manage projects and users efficiently. This tool facilitated project tracking, user allocation, and overall project coordination, ensuring efficient management and productivity.

## PROJECTS

**Project Management Tool**

03/2024 - 06/2024

Flutter , Firebase , Android Studio

Developed a Performance and Project Management Tool application using Flutter. The application incorporates distinct roles: Admins can manage projects, assign team leads, add users, track project progress, and oversee skills and levels. Team leads are responsible for assigning users to projects, while users can select their skills and levels. This tool streamlines workflows, enhances productivity, and ensures efficient project and performance management through an intuitive user interface.

**Online Job Portal**

12/2023 - 03/2024

ASP .NET Core , Entity Framework , SQL Server , Visual Studio

Developed an Online Job Portal using ASP.NET Core, Entity Framework, and SQL Server, with development in Visual Studio. The portal features distinct roles: Job Providers can post jobs with detailed descriptions, which are then reviewed by Admins. Upon approval by Admins, Job Seekers can view and apply for these jobs. Key features include user authentication, job posting and management, applicant tracking, and job and candidate search functionalities. The system ensures seamless and efficient recruitment processes through a robust, scalable, and user-friendly interface.

**Library Management System**

10/2023 - 11/2023

Java , MySQL , XAMPP , NetBeans

Developed a comprehensive Library Management System with user authentication and robust CRUD operations for managing books and students. The system featured book issuance and return functionalities, a homepage displaying all records, and search capabilities for book issuance and return details within specific date ranges. It included a real-time list of currently issued books, a defaulter list highlighting overdue returns, and provided users with detailed issuance and return records.
